

I would like to let you know my feelings about FM versus LPFM. I listen to K-Love which is a national broadcast carried on my local FM translator. This station provides positive encouragement and commercial free listening. The format of the station lets me know that my 9 year old daughter can listen and I don't have to wonder about any hidden messages or derogatory information she may receive. I encourage people to listen to this station because of its positive format and uplifting message, if it were removed from the airwaves this alternative to the negative ad filled stations currently offered would be lost. In todays negative world K-LOVE provides a sound encouraging alternative. Please don't give a priority to either FM or LPFM allow them to compete for the frequencies. Thank you.
